

9" SEMI-INTENSIVE EDGE ELEMENT

Our 9" Semi-Intensive Edge Element is designed as a definite boundary between gravel / paver and growth media that allows the flow of water but not of the substrate. Specific to this product, it:

- partners with our 1.6" Drainage/Retention Board; the **edging slots align directly with the height of the board** to ensure an unrestricted flow of excess stormwater
- utilizes a **"smooth slide" design** to make secure, invisible connections
- has **pre-fabricated inside and outside corners** for ease of installation
- **prevents overly moist media conditions** around the perimeter or in transition areas of the roof thus preventing anaerobic growing conditions

- Special order product

- 10 Lengths & Clips
- Full Pallet

- 10 Lengths & Clips (80')
- 100 Lengths & Clips per Pallet (800')

TECHNICAL DATA

System Type:

- Monolithic / Contiguous / Modular

Materials:

- 5052-H32 Aluminum

Material Thickness:

- 12 GA

Material Finish:

- Mill (natural aluminum)

Roof / Deck Slope Constraint:

- Up to 5° slope or 1:12 roof pitch

Water Permeability:

- Dependent on drainage/retention board chosen

Vegetated Roofing Use:

- Semi-Intensive vegetated roofs

Installation Requirements:

- Lay edge profile sections end to end on top of protective fleece, with foot of restraint toward vegetative portion of roof
- Slide Male Clips into Female Lengths
- Connect all components as shown on edging plan
