

RETENTION ROOF PROTECTIVE FLEECE - 15 oz

Our Retention Roof Protective Fleece is designed specifically for use within Blu-Vault Retention roofing systems and to increase water holding capacity of Blu-Garden 400-600 & 800 Modular System. Specific to this product, it:

- **protects the roof membrane** and/or root barrier against damage from light mechanical demands
- **separates materials** of incompatible substrates from one another
- provides unparalleled **water storage** & nutrients retention for high **stormwater retention capacity**
- has a mass/structure and water holding capacity designed with the dead load weight and plant palettes of the Extensive roof system in mind to give the perfect **balance of water holding capacity and protection**

Protection and Storage Fleece RMS 500k by

LEED Credits available for:
• Materials & Resources (MR)

- Individual Roll
- Full Pallet

- 1,076 ft² per Roll
- 6 Rolls per Pallet (6,456 ft²)

TECHNICAL DATA

Materials:

- Polyester (PES) Thread

Material Thickness:

- 0.23", 15 oz.

Roll Dimensions (W x L):

- 6' 6 3/4" x 114' 3/4"

Roll Diameter:

- 1' 1 3/4"

Roll Weight:

- 77 lbs.

Total Saturated Weight:

- 0.81 lbs. / ft²

Water Holding Capacity:

- 0.17 in³ / in² (0.102 gal / ft²)

Rot & Pathogen Resistant:

- Yes

Puncture Resistant:

- Yes

Vegetated Roofing Use:

- Blu-Vault & Blu-Garden

Installation Requirements:

- Overlap fabric by 6"
